Job Description

ROLE AND RESPONSIBILITIES

Faced with an ever-increasing cybersecurity threat, organizations need to maintain a vigilant approach to protect their systems and data, and Security Engineers play a key role in this process. Duties of our Security Engineers include the responsibility of completing risk assessments, identifying vulnerabilities within a network, and configuring firewalls, or configuring information systems to enhance existing security features. Security Engineers are expected to respond to, and document, any security threats, resolve technical faults and allocate resources to deliver real solutions in a cost-effective way. They must also be proficient in:

- Understanding complex technical issues and managing them within a fast-paced business environment
- Implementing, configuring and maintaining Information Systems Security solutions
- SIEM Integration into customer environments
- Identifying current and emerging technology issues including security trends, vulnerabilities, and threats
- Threat intelligence
- Sourcing and implementing new security solutions to better protect the organization
- Conducting proactive research to analyze security weaknesses and recommend appropriate strategies
- Participating in Incident Response and Forensic Investigations when required
- Draft Policies and Procedures for Information Security and Information Systems
- Onsite at client locations, short-term project work and longer-term staff augmentation as needed
- Other duties as required

QUALIFICATIONS AND EDUCATION REQUIREMENTS

- Information Technology related degree
- Certified Information Systems Security Professional is preferred
- Any Information Systems Security Certifications will be a plus
- Minimum of 7 years of experience in IT Engineering, Security, or Infrastructure
- Expertise across a variety of security products including firewalls, URL filtering, information security and virus protection
- The commercial acumen to provide cost-effective security solutions
- An enthusiasm for staying up to date with the very latest updates about security threats and solutions
- Strong time management and organizational skills
- Previous exposure to Linux and/or Windows Operating Systems, coding languages, and/or Networks
- Strong understanding of Cloud Technologies (Azure, AWS, Google Cloud, etc.)
- Intimate knowledge of Virtualization Technology is a must (Hyper-V and VMware ESX)

PREFERRED SKILLS

- Strong communication and collaboration skills
- Experience or training in junior engineers and administrators
- Maintain confidentiality
- Exceptional Customer Service skills
- Perform duties and responsibilities independently
- Self-motivated and natural problem-solving skills required

BENEFITS

We offer our employees a robust compensation package! Our comprehensive benefits include: medical, dental, and vision insurance coverage; 100% company-paid life and disability coverage, unlimited PTO after the first 100 days of employment, and much more. Blue Team Alpha proudly promotes from within as part of a strong commitment to providing career growth opportunities for employees of all levels. Our diverse business portfolio allows employees broad career options with the advantage of staying with the same organization.

The company is an equal opportunity employer and will not tolerate discrimination in employment on the basis of race, color, age, sex, sexual orientation, gender identity or expression, religion, disability, ethnicity, national origin, marital status, protected veteran status, genetic information, or any other legally protected classification or status.
