

A risk assessment is a holistic review of cyber risk throughout your organization. As a part of a broader risk management strategy for a business, this in-depth evaluation highlights potential challenges affecting your organization's mission while charting an actionable path to prioritizing future investments and activities to reduce overall business risk.

Identify and score potential threats or risks

A risk assessment helps to evaluate an organization's systems by considering harmful internal and external threats. In this process, a risk assessment also identifies current security vulnerabilities, inefficiencies, and noncompliance with standards for security policies.

Determine the business impact of threats

Quantitative and qualitative information regarding risk provides a common language for security professionals and executives to discuss business impact. This allows organizations to better understand their current situation, where they want to be, and how to get there.

Highly trained, experienced, & certified security professionals

Our team has helped hundreds of businesses across 12 industries in the public and private sectors with their assessment needs. We also have decades of experience and know-how to go beyond industry standards to perform a more detailed examination to help safeguard your systems.

Who needs a risk assessment?

- Every organization, dependent of size, should understand the gaps and weaknesses in its information security program.
- Operating in a regulated industry with compliance requirements often require risk assessments yearly.
- It's also important to switch provider yearly to get a new perspective.

Standards Supported

- HIPAA
- GDPR
- PCI
- FFIEC
- NYDFS
- HITRUST CSF
- NIST CSF
- NIST SP 800-171
- NIST 800-53
- ISO 27000-1
- SOC2
- SANS 20 CSC

Drive Risk Reduction with Qualitative and Quantitative Results

Put an ELITE, Highly Trained Team on Your Side

Our team consists of tenured cybersecurity professionals with the knowledge and certification to help you improve your security posture.

Certifications:

Certified Information Systems
Security Professional

Offensive Security
Certified Professional

Additional Certifications:

- Certified Incident Handler
- CHFI
- CompTIA Security+
- CompTIA Network+
- CompTIA Project+
- CompTIA Linux+
- CompTIA A+
- CompTIA CySA+
- CMMC-RP
- CNSS 4011
- CNSS 4013
- MCSE Cloud
- CIW Web Design Specialist
- CIW JavaScript Specialist
